## 2006 ONTARIO PERFORMANCE DATA FOR SPRING AND WINTER CANOLA

Table 1. Spring Canola Varieties (3-year means)

| Variety | Traits ${ }^{1}$ | Days from Planting to Maturity | $\begin{aligned} & \text { Yield }^{2} \\ & \text { (t } / \text { ha) } \end{aligned}$ | Free Fatty Acids (\% of Oil) | Brown Seed (\%) | Green Seed (\%) | Height (cm) | Lodging <br> $1=$ erect <br> 5 = flat | Distributor |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Hyola 401 | Hybrid | 98 | 2.41 | 0.39 | 0.87 | 0.53 | 107 | 1.7 | Advanta Seeds |
| Hyola 357 RR | Hybrid, RR | 98 | 2.21 | 0.42 | 1.42 | 0.53 | 103 | 1.8 | Advanta Seeds |
| 46 H 02 | Hybrid | 98 | 2.48 | 0.41 | 0.61 | 0.43 | 122 | 1.5 | Pioneer |
| 5020 | Hybrid, LL | 98 | 2.53 | 0.57 | 2.14 | 0.42 | 120 | 1.4 | Bayer CropScience |
| 45H21 | Hybrid, RR | 99 | 2.53 | 0.36 | 0.98 | 0.48 | 124 | 1.6 | Pioneer |
| 5030 | Hybrid, LL | 100 | 2.74 | 0.54 | 2.44 | 0.57 | 135 | 1.1 | Bayer CropScience |
|  | No. of Sites ${ }^{3}$ | 5 | 11 | 11 | 11 | 11 | 9 | 8 |  |

${ }^{1} R R=$ Roundup Ready ${ }^{T M}, L L=$ Liberty Link ${ }^{T M}$
${ }_{2} 1 \mathrm{t} / \mathrm{ha}=893$ lb/acre $=17.9$ bu/acre
${ }^{3}$ Number of sites were 4 in 2003, 5 in 2004 and 2 in 2005. Not all data are collected at all sites.

Table 2. Winter Canola Varieties (3-year means)

| Variety | Traits | $\begin{aligned} & \text { Yield }^{1} \\ & \text { (t/ha) } \end{aligned}$ | Free Fatty Acids (\% of Oil) | Brown Seed (\%) | Green Seed (\%) | Winter Survival (\%) | Height (cm) | Lodging 1 = erect $5=\text { flat }$ | Maturity <br> Date | Distributor |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Kronos | Hybrid | $\begin{gathered} 2.60 \\ (2.78)^{2} \end{gathered}$ | $\begin{gathered} 1.5 \\ (0.73) \end{gathered}$ | $\begin{gathered} \hline 2.1 \\ (2.0) \end{gathered}$ | $\begin{gathered} \hline 0.2 \\ (0.2) \end{gathered}$ | $\begin{gathered} 75 \\ (95) \end{gathered}$ | $\begin{gathered} 126 \\ (119) \end{gathered}$ | $\begin{gathered} 1.4 \\ (1.4) \end{gathered}$ | $\begin{gathered} \hline \text { July 10 } \\ \text { (July 10) } \end{gathered}$ | C\&M Seeds |
|  | No. of Sites ${ }^{3}$ | 6 | 4 | 4 | 4 | 2 | 5 | 2 | 2 |  |

[^0]
[^0]:    $1 \mathrm{t} / \mathrm{ha}=893 \mathrm{lb} /$ acre $=17.9 \mathrm{bu} /$ acre
    ${ }^{2}$ Values in parentheses are calculated excluding the Elora 2005 site, which had extremely high insect pressure and high free fatty acids.
    ${ }^{3}$ There were 2 valid test sites in each of 2002, 2004 and 2005. There are no data for 2003. Not all data are collected at all sites.
